

# Flitebag Enduro

## Enduro - The Next Generation

**Flitebag Enduro** panels are fabricated from structural **aluminium honeycomb**; a material originally developed for the aerospace industry offering exceptional strength to weight performance. Enduro cases combine user-friendly **curved edge frame** and reinforced corners to provide highly durable cases of the highest calibre. An entirely new construction system provides high strength together with a dimensional accuracy previously not known within the traditional case making industry. An eye-catching design that stands out from more conventional flight cases.

Curved edge frame

Honeycombed aluminium panel x-section

The Enduro briefcase is an ideal style to use where internal case height is small relative to its other dimensions. Perfect for a vast range of applications such as, tool kits or presentation of samples. Available with a choice of fittings.

The multi-function Enduro trunk style case can be constructed with either a hinged lid or a lift-off lid. Base options apply.

The Enduro top hat system allows the transport of tall, heavy or ready-to-display equipment, where loading components into a deep trunk may otherwise present a problem.

Available in 6 colours :  
Black, Red, Blue, Green, Silver  
Grey or Natural aluminium

Trunk with pallet feet for fork lift

## Features & Options

Enduro cases are thoughtfully designed to withstand the rigours of regular transit & rough handling in a variety of environments. Catches and handles are recessed while user-friendly, curved edge extrusions and corners combine to provide an eye-catching yet durable solution.

All Enduro cases are made to order and can be supplied with a variety of fittings to suit individual requirements.

Recessed butterfly catch

Recessed handle

Gasket seal

Curved edge corners

All cases supplied with natural aluminium extrusions as standard.  
Black powder coated extrusions and fittings available as an optional extra, please ask for details.

Briefcase style and smaller sizes are supplied as standard with small rubber feet. All other styles are fitted with pre-threaded aluminium base plates to accept optional moulded fork-lift pallet feet or swivel castors, for bulky or heavy contents.
