

Thermodyne® have been continually developing packaging systems for over 35 years to guarantee the safe transit of sensitive equipment while meeting individual needs.

Thermodyne® containers are made in coloured Polyethylene (PE - HD) ensuring maximum protection even in the most extreme conditions.

Materials and design combine to produce a container suited for repeated usage while giving extended life expectancy.

Thermodyne® packaging systems are used in many industries including; aerospace, electronics, military, computing, medical and control engineering; i.e. Lufthansa store and transport highly sensitive spare parts in Thermodyne® made containers.

Thermodyne® - a Packaging System, custom-made, from a specialist backed by experience

SIZES

Thermodyne® containers can be supplied in over 300 standard sizes. Special designs and sizes can be custom-made as required.

CUSTOM-MADE PACKAGING SYSTEMS

For non-standard containers, individual solutions can be designed and produced. Thermodyne® offers prototype-manufacturing services for the prompt and efficient realisation of your requirements.

Interiors are designed to meet individual specification using high quality materials, i.e. PE- or PU-foam and light metal fittings.

A wide range of additional fitting options and features are offered by Thermodyne®. These include: extendable handles, wheels, document pockets, security padlocks, variety of special fixtures and fittings.

Your company name or other permanent I.D.'s can be moulded into the shell.

PRODUCT CHARACTERISTICS:

- stackable
- easy handling
- lightweight
- functional
- solid & robust
- re-usable
- resistant to dents, knocks and shocks
- resistant to most chemicals & solvents
- O-ring sealed

STANDARD COLOURS:

	white
	yellow
	red
	military olive
	blue
	charcoal grey
	black
